Subject: Gold King Mine Incident - items for your staff

Hello RICT members,

A couple of things to pass along...

- Please remind all staff who are working on this incident to keep careful documentation. We are getting FOIAs and, if we keep records tidy from the beginning, it will be easier for everyone. There is a shared drive available for any documents – I:\ManagedShar3\Gold King Mine Documentation and all emails should be cc'd to this email address: r08_documentation_unit_leader@epa.gov

- All staff deployments should be coordinated through the Resource Unit Leader in Area Command in Durango (you can contact them at R08_Resource_Unit_Leader@epa.gov) based on the needs identified. Only staff requested by Area Command will be funded by the incident. Also, even if personnel are deployed for your own programmatic needs, this should still be coordinated through command in Durango because there are many locations that are closed to non-responders or logistically are just difficult to access.

Thank you for your cooperation!!

Gina Cristiano

Emergency Response & Planning Coordinator
